have a mix of bread-and-butter vs. more challenging and complex cases. I also do diagnostic radiology when my partner is doing IR. TIV: Do you have a favorite memory or two about your classmates or faculty from your residency years? **DR:** I have very fond memories of residency at BIDMC, including working hard but also really enjoying those times we got together outside of work. We had some fun wine and cheese events, some good-natured wisecracks by Dr. Andrew Hines (BIDMC Class of 2009), and some epic roasts by Dr. Jonny Kruskal. I also remember Dr. Ferris Hall cracking everyone up after showing some unusual cases of arthritis that could affect younger adults. He reassuringly said, "Now, all of you are wondering if you already have this... and some of you do!" TIV: Do you have an interesting fact about yourself, such as a special talent or hobby? DR: Since moving to California, I switched from snow sports to regular surf sessions when possible. Of course, this photo (below) is not in Northern California (where a decent wet suit is always needed!) but rather from spring

**TIV:** Is there anything else you'd like to share with your colleagues?

**DR:** I hope everyone is doing well out there during COVID-19 and keep in

The Radiology Research Steering Committee continues to iterate on our departmental research webpages and explore opportunities to create a more holistic showcase of our work. Stay tuned for updates in the weeks ahead. **Don't Miss Out!** <u>Annual Radiology Meetings and Abstract Deadlines</u>

The Alumni Corner

A Q&A with Rich Rana, MD

In this new column, we've been highlighting our Department of Radiology alumni to help keep us connected and grow our global imaging community. For our third Q&A, The Inside View caught up with Dr. Rich Rana, who was a diagnostic radiology resident with us from 2007-2011. Today, he works on the Interventional

Radiology service that he founded at Kaiser Permanente Redwood City Medical Center in California.

The Inside View: Thank you for

participating in our alumni column, Dr. Rana! To kick things off, what

have you been up to professionally since graduating from our residency program? Dr. Rana: Thanks for the opportunity to reconnect with BIDMC Radiology! After residency, I was an MGH Interventional Radiology (IR) fellow (July 2011–June 2012), then relocated to California, where I was in private practice in Santa Monica (July 2012–June 2013) and then started at Kaiser Permanente in Northern California in June 2013. I was lucky to join the radiology group of Dr. Ken Lai (BIDMC Class of 2009) at Redwood City Kaiser Permanente; he is now our chief and doing an excellent job! I hadn't been here too long when we were lucky enough to hire Dr. James Kang (same class as me, BIDMC Class of 2011)! Here I started the IR section, which is a small but busy service with just two MDs. We do the whole range of IR and

Dr. Rana catching a wave in Mexico in 2019 If you're a BIDMC Radiology alum who would like to participate in the column or nominate someone to be featured, please email Communications Director Lindsay Oslund at <a href="mailto:loslund@bidmc.harvard.edu">loslund@bidmc.harvard.edu</a>.
